## United Kingdom products

### Session Cases Service and Archive

The Session Cases takes precedence over all other case law series in Scotland. With coverage starting in 1821, the current series of Session Cases offers all decisions reported in full, checked and revised by presiding judges before publication, from all the key appellate decisions, civil and criminal, from the Court of Session and High Court of Justiciary in Scotland. In addition, selected cases decided at first instance and all decisions on Scottish appeals to the Privy Council, the House of Lords and the Supreme Court are included. The database also includes Fraser's Court of Session Cases from 1898 to 1905, and Rettie's Session Cases from 1873 to 1897, Macpherson's from 1862 to 1872, Dunlop's from 1838 to 1861, and Shaw's from 1821 to 1837.

### State Trials

Access over seven centuries of higher criminal jurisprudence covering English trials relating to offences against the state. This includes Cobbett's State Trials and the New Series (Macdonell and Wallis), with additional material sourced from the National Collections and the English (Nominate) Reports. The series features coverage between 1163 and 1858.

### The Times Law Reports

Access all case reports published in The Times newspaper. This collection incorporates over 15,000 cases dating back to 1987. Over 800 cases are published each year and come from a wide range of jurisdictions, including the UK courts, the European Court of Human Rights and the International Court of Justice in the Hague.

### UK Dockets

The dockets available on vLex include UK High Court dockets that date back to 2010, as well as Supreme Court and Court of Appeal dockets from 2019 onwards. For the first time, this growing collection of over 200,000 UK dockets can be accessed in one location. This enables researchers to locate information faster, reduces the risk of important documents being missed and helps researchers gain a more comprehensive understanding of current and previous matters. UK dockets on vLex are available for ongoing access, so researchers no longer need to pay per session, or work to timed access restrictions as they would with traditional docket services. Larger organisations can also benefit from multi-user access to significantly reduce the time it takes for different team members to search and retrieve documents.
