My name is Schuyler Wilton and I am a Medical Laboratory Technologist, I have worked as a Technologist for over 7 years in various areas of the laboratory. I was originally part of BC Biomedical and then joined Lifelabs and the BCGEU when the two companies came together. I became a shop steward shortly after joining the BCGEU until I left the position to go on maternity leave. I have been involved in assisting members within my team with questions in regards to the current contract that have arisen between our management and staff. I would like to have the opportunity to represent my fellow union members on the bargaining committee. My goal is to aid in getting our members the best contract possible. I have come to know our Union contract well including the issues that it does not address as well as the vague language used in some key areas. Over the past few years this company and our positions have changed greatly and I feel that our contract needs to be improved to reflect these changes.
