

My name is Zack Powell, I'm hoping to join the local board and I've been working at BC Cannabis in Mission since 2020. With the Cannabis side of the LDB being so new there hasn't been as much union representation, so members aren't fully aware of what being a part of a union entails. They have brought in management that is new to the company who don't have knowledge of how things should be done, and because of this the collective agreement is often not followed to the extent it should be. I've had to fight to have my voice heard regarding conversion amongst other things and I've watched people I work with become the subject of the company's harassment. I hope to be able to spread the union's presence to more stores and help members have their voices heard, because if this is happening in my store we can't be the only ones. I appreciate your consideration.
