TMG Modelling Assistant

The University of Toronto Travel Modelling Group (TMG) is funded by Toronto region planning agencies to develop and apply advanced activity-based travel models for operational planning use (<https://tmg.utoronto.ca/>).

We currently have several model system application projects that are straining our staff resources, and so are looking for a modelling assistant who can contribute to one or more of these projects as a limited-term casual employee on either a part-time or full-time basis.

Experience with travel demand analysis and model estimation is a pre-requisite. Experience in the use of Emme and/or Visum network modelling packages, as well as Python programming, is highly desirable. Hours and pay will be commensurate with experience of the applicant.

Anyone interested in applying for this position, please send a full CV, academic transcripts, a brief (one page maximum) description of your interest and experience in activity-based travel demand modelling, and the nature of your availability (part- or full-time) to eric.miller@utoronto.ca.

Eric J. Miller, PhD
Professor, Department of Civil & Mineral Engineering
Director, Mobility Network
Research Director, Data Management Group; Travel Modelling Group
